Blessings in a Shoebox Fishing Kit Step-by-Step Tutorial Updated (2024)

Materials

- 1. Fishing Kit Mesh Bag Zipper Mesh Bag
- 2. Monofilament Fishing Line (Please consider including a small spool of fishing line so that the monofilament is useful and doesn't get tangled. Once it's tangled, it can't be used <u>Southbend Fishing Line</u>. Another option is to purchase <u>Foam Fishing Line Spools</u> and wrap with <u>Fishing Line</u>.
- 3. Carbon Steel <u>Fishing Hooks</u> 10 20 per Kit and <u>Mini Plastic Containers</u> especially important to keep the hooks safe.
- 4. I prefer foam bobbers rather than the plastic bobbers <u>Fishing Rig Floats</u>. They are light weight, won't crack, and they won't kink the fishing line. Pack them in the small containers.
- 5. I include <u>Brass Fishing Weights</u> and Fish Eye Beads. Split shot lead weights are highly toxic and can cause multiple health issues for children just by touching them. They are now illegal to use in several states because of the irreversible damage to the environment. Include as many as you want packed in the small containers.
- 6. I think the boys will like these <u>Fishing Worms</u> so I include a few but they can also use local bait.
- 7. <u>Small Scissors</u> to cut the line. These scissors are fantastic, sharp, priced right, and they come with covers for the tips.
- 8. Optional <u>Fish Keychains</u>. I want to add something special.

Easy Steps to Make Fun, Colorful, Compact OCC Fishing Kits

- 1. Add the scissors to the pouch.
- 2. Place the fishing line over the scissors
- 3. Put the fish hooks in a separate small container and add them to the pouch.
- 4. Put the floats, weights, and worms in small containers and add them to the pouch.
- 5. Zip the pouch closed.
- 6. Clip the fish keychains on the pouch zipper and you're done!

As always, I suggest buying in bulk! Use the fishing kits that you make for your shoeboxes and then make more to donate as fillers.
